

RADIANT IMAGING, Inc.: Press Release

Hubert Kostal Joins Radiant Imaging as Vice President of Sales and Marketing

7/5/07
Duvall, WA

Hubert Kostal has joined Radiant Imaging, Inc. as Vice President of Sales and Marketing. In this role, Kostal will manage the company's direct sales force and distributor network. He will also direct all technical sales support, product management, and corporate and product marketing activities.

Kostal has extensive experience in market development for photonics products in the industrial, consumer and communications areas. Prior to joining Radiant Imaging he served as Vice President of Business Development at APIC (Advanced Photonic Integrated Circuits) Corp. and has also held executive marketing and sales positions at NanoOpto, SpectraSwitch, TranSwitch, and Lucent Technologies. Kostal received his Ph.D. in Mathematics from The University of Texas at Austin. He has authored numerous technical and trade papers and has been awarded two patents.

"Hubert has repeatedly demonstrated an ability to define innovative product and marketing strategies, and to successfully grow market presence and sales volumes," notes Radiant Imaging Chief Executive Officer Ron Rykowski. "We're confident that he can do this with our products for display and light source metrology, keeping Radiant Imaging at the forefront of a technology that we were instrumental in first developing."

About Radiant Imaging. Radiant Imaging, Inc., founded in 1992, is the worldwide leader in imaging systems for light and color measurement, and illumination engineering tools and services. Radiant Imaging's technologies are focused on providing lighting and display system manufacturers with enhanced design capabilities, greater product development efficiency, improved manufacturing productivity and increased competitive effectiveness in the world marketplace. Radiant Imaging's four major product areas include ProMetric® light and color measurement systems; Radiant Sources light source characterization systems and source data; Imaging Sphere systems for characterizing scatter and appearance, measuring luminous intensity and characterizing view angle performance; and Application Engineering Services and Software to support development of application-specific solutions incorporating ProMetric® technology.
